ABSTRACT

What contribution would the Project make: -

The project would help in effective and systematic record keeping that is storing and retrieving of useful data. Project will be able to give the report so that management can make decisions based on those reports.

Scope of the study: -

The main Scope of study: -

1. It should contain all the information of Company and Internship which is in this site.
2. It should contain all the information of Job Seeker like Personal Detail, Professional Detail, and Educational Detail etc.
3. It should process and evaluate Internship registered by companies.
4. It should contain information related to Internship expiry or re registration.
5. It should maintain proper financial records.
6. It should have Administrator for scheduling administrative work of site.

Objective of the project:

Computerized *"Internship Management Portal for Students"* is developed to facilitate the General administration system to manage the various information of the Job Seeker and Job Provider and the processes involved in a placement company. So, that organization can access accurate information quickly and easily as and when required, thereby improving its operational efficiency & effectiveness

In today's competitive environment, where Everybody wants to be on the top, Information plays very crucial role. As fast as information is accessed and processed, it can give good results.

Today Internet is the fast way of transferring Data and Information over wide area, hence I have used internet as a way for exchanging information.

Computerized system helps to fulfill these goals. Computerization of the official works will help in doing lot of manual work quickly. It will help in easy storage and access of all information, in short period of time.

Specific Objective of the site:

Objective of doing this project is to enhance my knowledge in the field of E-com technology using HTML, CSS, JavaScript & PHP as a language. Some of the client requirement and objectives of this site is as under: -

- To increase the business of Client.
- To make it Global.
- To facilitate job search.
- To facilitate company so that it can search for best candidates available.
- To act as a middleman connecting Job seeker and Provider

Features of the site:

It has the features of providing all the information online (through the net). About the Internship and About the Job seeker.

- This web site built on 3 Tier Architecture.

- The site acts as a middleware for the Job Seeker and Job Provider.

- The site has the facility to inform the Seeker and Company about the job and candidate.

- Employer also inform the Job Seeker via telephone.

Modules of project:

The project can be divided in to three main modules.

- **Registration module**
- **Employees section**
- **Employers section**

Module 1:

Registration module, which is further sub-divided into: -

- Job Employer Registration.

- Change Password Job Employees.

- Change Password Employers.

- Forget Password Job Employees.

- Forget Password Employers.

- Login for both Job Employer and Employees.

Module 2:

Job Employer section, which is further sub-divided into –

- Schedule for an interview date

- Schedule for an interview time

- Call for an asking Job Seeker want to go for an interview?

- Call for an asking Job Seeker about feedback of interview facing?

- Check the status true if selecting in the job.

Module 3:

Job Employees section, which is further sub-divided into four sub-sections: -

- Update their profile according to the Internship description.

- Set profile picture and CV.

- Apply for an Internship.
